

B1 Cont, at least 1 bond or functional group selected from the group consisting of an amido bond, a sulfide group, a cyano group, an ester group, a sulfone group, a ketone group, and an imido group are used in said base resin.

---

B2 3. (Amended) The laminate according to Claim 1, wherein one or more resins selected from the group consisting of nylon 46, nylon 11, nylon 6-10, nylon 12, nylon 6, nylon 66, poly(phthalamide), polyphenylene sulfide, poly(ether nitrile), polyethylene terephthalate, polybutylene terephthalate, polysulfone, poly(ether sulfone), poly(ether ketone), poly(ether imide) and melt-type liquid crystal polyester are used in said base resin.

4. (Amended) The laminate according to Claim 1, wherein poly(phthalamide) is used in said base resin.

5. (Amended) The laminate according to Claim 1, wherein melt-type liquid crystal polyester is used in said base resin.

6. (Amended) The laminate according to Claim 1, wherein at least one titanate is used as said fibrous filler.

7. (Amended) The laminate according to Claim 1, wherein at least one borate is used as said fibrous filler.

8. (Amended) The laminate according to Claim 1, wherein wallastonite is used as said fibrous filler.

9. (Amended) The laminate according to Claim 6, wherein at least one compound selected from the group consisting of potassium titanate, calcium titanate, and barium titanate is used as said titanate.

10. (Amended) The laminate according to Claim 7, wherein at least one compound selected from the group consisting of aluminium borate and magnesium borate is used as said borate.

11. (Amended) The laminate according to Claim 4, wherein at least one compound selected from the group consisting of a titanate, a borate and wallastonite is used as said fibrous filler.

12. (Amended) The laminate according to Claim 1, wherein said resin composition further contains a powdery filler having an average particle size of 0.1 to 20  $\mu\text{m}$ .

B2  
CONT.  
13. (Amended) The laminate according to Claim 1, wherein said resin composition further contains a spherical filler having an average particle size of 0.1 to 20  $\mu\text{m}$ .

14. (Amended) The laminate according to Claim 12, wherein wallastonite is used as said fibrous filler and kaolin is used as said powdery filler.

15. (Amended) The laminate according to Claim 13, wherein aluminium borate is used as said fibrous filler and silica is used as said spherical filler.

✓  
Please add the following new claims:

16. (New) The laminate according to Claim 1, wherein said fibrous filler has an average fiber diameter of 0.3 to 1  $\mu\text{m}$  and an average fiber length of 10 to 30  $\mu\text{m}$ .

B3  
17. (New) The laminate according to Claim 1, wherein said fibrous filler is selected from the group consisting of silicon carbide, silicon nitride, zinc oxide, alumina, calcium titanate, potassium titanate, barium titanate, aluminium borate, calcium silicate, magnesium borate, calcium carbonate, magnesium oxysulfate and wallastonite.

18. (New) The laminate according to Claim 1, wherein said substrate comprises a core layer containing no fibrous filler and a superficial layer containing said fibrous filler.

19. (New) The laminate according to Claim 18, wherein said core layer contains powdery filler.

20. (New) The laminate according to Claim 1, wherein said substrate comprises a plurality of resin layers containing said fibrous filler.
